Bank Pursues Initiatives for Persons with Visual Impairments

PR Newswire

Thursday, November 21, 2002 11:49 EST

JOURNAL CODE: PR LANGUAGE: ENGLISH RECORD TYPE: FULLTEXT

DOCUMENT TYPE: NEWSWIRE

WORD COUNT: 908

TEXT:

Sovereign **Bank** and the Boston-based Disability Law Center, Inc. (DLC) today announced that the **bank** has launched several major initiatives intended to provide easier access to its **banking** services to individuals with visual impairments as well as other customers. These initiatives include the...

...several Sovereign locations in Massachusetts and Pennsylvania, and hundreds more will become part of the **bank** 's **ATM** network during the next three years. Talking ATMs, which deliver

audio information privately through any standard personal cassette player headset, make it possible for persons who are **blind** or who otherwise have difficulty reading an **ATM** screen to use the **ATM** independently.

Sovereign's

Talking ATMs will enable a user to hear audio instructions either in...

...will be in place by June 30, 2003.

That number will increase until all Sovereign **ATM** locations are equipped with

the talking versions by June 30, 2005. Sovereign is installing new ATMs as well as upgrading existing ATMs to implement its Talking **ATM** program.

In addition to Talking ATMs, Sovereign has improved its Web site.

Ninety

percent of...

...a

result, the pages are now easier to navigate for customers with visual impairments using **screen reader software** .

Sovereign will also be providing monthly **bank** statements for personal accounts, as well as its marketing and disclosure materials, in alternative formats...

...the initiatives as part of a settlement agreement

with the Bay State Council of the **Blind** , Sight Loss Services, the DLC, and

several individuals with visual impairments. **Bank** officials worked closely

with these parties to resolve a dispute over whether the **bank** provides persons

with visual impairments legally required access to the bank 's ATMs,
printed
materials, and Web site.

"This agreement has provided us with an opportunity...

...better serve an
important segment of our customers," noted Maxine Rogers,
telecommunications
manager at Sovereign Bank . "By working together with these various
parties,
we have come up with an effective approach...

...with visual impairments."

Kim Charlson, immediate past president of the Bay State Council of the
Blind , praised the bank 's initiatives. "We are very pleased that
Sovereign

Bank has so clearly demonstrated its commitment to improving
accessibility for
people who are blind and visually impaired ," Charlson said. "We
particularly
commend their extraordinary corporate commitment to 100 percent
accessibility
for Talking...

...its Web site
accessible under the standards established by the World Wide Web
Consortium."

The bank 's Talking ATMs will be equipped with universal audio jacks.
Sovereign will provide listening devices...

...visual impairments so
they can receive private audio instructions for transactions typically
displayed on the ATM screen, such as cash withdrawals, balance inquiries,
transfers, and payments and deposits. To locate the nearest Sovereign
Talking

ATM , consumers may call Sovereign Direct at 877-SOV- BANK
(877-768-2265). A
complete list of Talking ATM locations will be available in the future on
the
Sovereign Web site.

"Sovereign Bank is committed to providing world-class service to all
of
its customers," noted John Hamill, chairman and chief executive officer of
Sovereign Bank New England. "These initiatives will provide easier
access to
our services to persons who are visually impaired , as well as to those
who
have other impairments." He pointed out that Associated Services for the
Blind , Philadelphia, recently recognized Sovereign for its efforts in
serving
those who have visual impairments.

Sovereign...

ABSTRACT INDICATOR: Abstract

ABSTRACT: Eleven papers, presented at a conference held at the World Bank in fall 1997, provide an introduction to the basic concepts of geographical information systems and a sample of their different applications to spatial analysis. Papers focus on a review of different methods and approaches to geographical targeting; lessons from USAID experience for applications of a GIS in program impact evaluation; combining census and survey data to study spatial dimensions of poverty in Ecuador; community targeting for poverty reduction in Burkina Faso; applying household expenditure survey data to improve poverty targeting in Ghana; spatial indicators of access and fairness for the location of public facilities; evaluation of food security in the Sahel; using a GIS to target river blindness control activities in Guatemala; a geographical information system applied to a malaria field study; a geographical information system as a component of the animal health information system in Thailand; and location criteria of nongovernmental organizations providing credit to the poor in Bangladesh. Bigman is at the International Service for National Agricultural Research. Fofack is with the World Bank. No index.

DESCRIPTOR(S) (1991 to Present): Size and Spatial Distributions of Regional Economic Activity (economic geography) (R120); Economic Development: Human Resources; Income Distribution; Migration (nutrition, health, education, fertility, household structure and formation, labor markets) (O150); Measurement and Analysis of Poverty (I320)

KEYWORD DESCRIPTOR(S) (1991 to Present): Poverty Alleviation; Poverty; Spatial

ABSTRACT INDICATOR: Abstract

ABSTRACT: Good governance and administrative reform issues now form an integral part of the development debate. Multilateral agencies (e.g. World Bank, UN) and bilateral donors insist that issues such as market accessibility, competition, human rights, financial accountability are integral parts of this debate. The South Pacific Island countries cannot divorce themselves from the overall thrust of these issues. The paper argues that their geography, unique socioeconomic features and global political situation must determine their reform agenda. Issues which are appropriate for other countries may not necessarily be the best option for them. These unique features (e.g. tribal nature of their societies, existence of non-monetised economy, little on-shore natural resources in many countries, small size of their domestic economies, locational disadvantages) should determine their reform strategy. Failure to do so would not provide them with an administrative structure suitable for their sustainable development needs. They must not **blindly** follow reform agenda of other countries.
